

FDA Food Contact Compliance

Volara Type A, G, EO, HPT, and TQX, irradiation cross-linked polyolefin foam, comply with the Food and Drug Administration regulations for use in contact with food.

Specifically, Volara Type A, G, EO, HPT, and TQX are manufactured from polyolefin resins complying with 21 C.F.R 177.1520 (c) 2.1 and meet C.F.R 178.3010. Also, Volara Type A, G, EO, HPT, and TQX comply under C.F.R 177.1210, "Closures with sealing gaskets for food containers."

This means that a whole new series of food container and food contact applications are now possible using Volara.
