

Technical Data

# Volara<sup>®</sup> Type HPT

## PRODUCT DEFINITION

Volara type HPT is a member of the Volara HP family of precision foams. HP foam products are an exciting addition to Sekisui Voltek's Volara product line. The HP foam making process represents the highest level of foam processing capability, creating products of unequalled gauge and density control.

This new process capability relies on 45 years of processing experience and advanced operator controls throughout the manufacturing process.

HEAT STABILITY UP TO  
**180° F**

ROLL FORM UP TO  
**6500ft.**

**CUSTOM**  
COLORS AVAILABLE

### PRODUCT CHARACTERISTICS

- Superior thickness and density control
- Unmatched quality and product uniformity
- Ultra consistent product performance
- Available as an ultra thin product
- High density for high strength

### PRODUCT FORM

- Produced in roll form up to 6500 lineal feet
- Density: 8pcf to 22pcf
  - Thickness range: 0.012" to 0.080"
  - Width range to 64"

### PRODUCT COLORS

- Standard colors are natural-white and black
- Custom colors are available on request

## APPLICATIONS

Transportation  
Industry

General  
Industrial

Industrial  
Tape

Recreation  
& Leisure

Packaging  
Dunnage

Aviation &  
Aerospace

Medical Tape  
& Healthcare
