

# Volara Nomenclature

Voltek grades show the target density, resin blend, thickness, color and width and length.

**Density** (in pcf): 040 = 4.0  
Target density in pounds per cubic feet (lb/ft<sup>3</sup>)

**Resin Blend:** SVS  
There are a variety of resin blends and each formulation gets a grade designation by using up to 3 letters.

**Thickness** (in): 0118 = 0.118  
Target thickness in inches (in)

**Color:** NA  
If the product has a colorant, the color designation would coordinate with said color (Example: BK = Black, WH = White, NA = Natural)

**Width** (in): 60"  
Width in inches (in)

**Trimmed:** T (Recommended)

**Length** (ft): 600'  
Length measured in feet (ft)
