

Animal Skin Irritation & Toxicity Studies of Volara®

A cross section of Volara® foams were tested according to ISO 10993-5 for Cytotoxicity Agarose Overlay, ISO 10993-10 for Primary Skin Irritation and Ocular Irritation, and ISO 13485 for Oral Toxicity to illustrate the excellent properties of these foams for medical and toy use. We do however; recommend that customers test the particular foam to be used to assess the acceptability for use in the specific applications.

The following results were obtained for all of the Volara® grades listed below:

Grades

020EO125WH	020EOX 125WH	060EO 0031WH
040EO 0063WH	040EOX0063WH	034TBX0063WH

Results

Cytotoxicity	Non-toxic
Primary Skin Irritation	Non-irritant
Ocular Irritation	Non-irritant
Oral Toxicity	Non-toxic

Complete details of the testing are available upon request.
