

Volara® Nomenclature Example

Voltek grades show the target density, resin blend, thickness, color and width and length.

Density (in pcf): 040 = 4.0
Target density in pounds per cubic feet (lb/ft³)

Resin Blend: SVS
There are a variety of resin blends and each formulation gets a grade designation by using up to 3 letters.

Thickness (in): 0118 = 0.118
Target thickness in inches (in)

Color: NA
If the product has a colorant, the color designation would coordinate with said color (Example: BK = Black, WH = White, NA = Natural)

Width (in): 60"
Width in inches (in)

Trimmed: T (Recommended)

Length (ft): 600'
Length measured in feet (ft)
